

Problem:

When people are in pain from operations, sprains, or from any injury, they should not have to be concerned about what is holding the ice to the injury and whether it is staying in place.

MedIcePax, LLC.'s EZ hot/cold Therapy is a hands free system that allows you to treat yourself immediately with cold compression when you injury yourself at sport, work or general activity. The Kit is designed with a special Velcro Hook that fastens to any elastic bandages (ace), and is water resistant.
